Thank you for purchasing this PIONEER product.
To ensure proper use, please read through this manual before using this product. It is especially important that you read and observe WARNINGs and CAUTIONs in this manual. Please keep the manual in a safe and accessible place for future reference.

FCC ID: EW4C95
MODEL NO.: DEH-S6000BS/DEH-S6010BS
IC: 4250A-C95
This device complies with Part 15 of FCC Rules and Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of this device.
This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.
The Bluetooth antenna cannot be removed (or replaced) by user.
This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines and RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment has very low levels of RF energy that it deemed to comply without maximum permissive exposure evaluation (MPE). But it is desirable that it should be installed and operated keeping the radiator at least 20cm or more away from person's body (excluding extremities: hands, wrists, feet and ankles).

Alteration or modifications carried out without appropriate authorization may invalidate the user’s right to operate the equipment.

Note
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
– Reorient or relocate the receiving antenna.
– Increase the separation between the equipment and receiver.
– Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
– Consult the dealer or an experienced radio/TV technician for help.

The Safety of Your Ears is in Your Hands
Get the most out of your equipment by playing it at a safe level—a level that lets the sound come through clearly without annoying blaring or distortion and, most importantly, without affecting your sensitive hearing. Sound can be deceiving.
Over time, your hearing “comfort level” adapts to higher volumes of sound, so what sounds “normal” can actually be loud and harmful to your hearing. Guard against this by setting your equipment at a safe level BEFORE your hearing adapts.

ESTABLISH A SAFE LEVEL:
• Set your volume control at a low setting.
• Slowly increase the sound until you can hear it comfortably and clearly, without distortion.
• Once you have established a comfortable sound level, set the dial and leave it there.

BE SURE TO OBSERVE THE FOLLOWING GUIDELINES:
• Do not turn up the volume so high that you can't hear what’s around you.
• Use caution or temporarily discontinue use in potentially hazardous situations.
• Do not use headphones while operating a motorized vehicle; the use of headphones may create a traffic hazard and is illegal in many areas.

⚠️ WARNING
• Do not attempt to install or service this product by yourself. Installation or servicing of this product by persons without training and experience in electronic equipment and automotive accessories may be dangerous and could expose you to the risk of electric shock, injury or other hazards.
• Do not attempt to operate the unit while driving. Make sure to pull off the road and park your vehicle in a safe location before attempting to use the controls on the device.

⚠️ CAUTION
• Do not allow this unit to come into contact with moisture and/or liquids. Electrical shock could result. Also, damage to this unit, smoke, and overheating could result from contact with liquids.
• Always keep the volume low enough to hear outside sounds.
• This product is evaluated in moderate and tropical climate condition under the Audio, video and similar electronic apparatus - Safety requirements, IEC 60065.

CAUTION
This product is a class 1 laser product classified under the Safety of laser products, IEC 60825-1:2007.

After-sales service for Pioneer products
Please contact the dealer, distributor from where you purchased this unit or the authorized PIONEER Service Station for after-sales service or any other information. In case the necessary information is not available, please contact the companies listed below:
Please do not ship your unit to the companies at the addresses listed below for repair without contacting them in advance.

**USB devices (including Android™)/iPhone**

1 Open the USB port cover.
2 Plug in the USB device/iPhone using an appropriate cable.
NOTE
To automatically switch to [USB] source when a USB device/iPhone is connected to the unit, set [USB AUTO] to [ON] in the SYSTEM settings (page 39).

⚠️ CAUTION
Use an optional Pioneer USB cable (CD-U50E) to connect the USB device as any device connected directly to the unit will protrude out from the unit, which could be dangerous.

Before removing the device, stop playback.

AOA connections
For details on AOA connection, see page 30.

MTP connection
A device installed with Android OS 4.0 or later can be connected to the unit via MTP, using the cable supplied with the device. However, depending on the connected device and the numbers of the files in the device, audio files/songs may not be able to be played back via MTP. Note that MTP connection is not compatible with WAV file formats and FLAC file formats, and cannot be used with the MIXTRAX function.

NOTE
If you use an MTP connection, [PHONE CONNECT] needs to be set to [USB MTP] in the SYSTEM settings (page 39).

AUX
1. Insert the stereo mini plug into the AUX input jack.
2. Press SRC/OFF to select [AUX] as the source.

NOTE
If [AUX] is set to [OFF] in the SYSTEM settings, [AUX] cannot be selected as a source (page 38).

### About MIXTRAX (USB/iPhone only)

The MIXTRAX function creates a non-stop mix of your music library, accompanied by illumination effects. For details on MIXTRAX settings, see page 42.

#### NOTES

- iPhone needs to be connected with Pioneer ARC APP via USB for using this function (page 29).
- This function is not compatible with an Android device connected via MTP.
- Depending on the file/song, sound effects may not be available.
- Turn the MIXTRAX function off if the illumination effects it produces interfere with driving.

1 Press 3/MIX to turn MIXTRAX on/off.
**Bluetooth**

**Bluetooth connection**

**Important**
If ten or more Bluetooth devices (e.g. a phone and separate audio player) are connected, they may not work properly.

1. **Turn on the Bluetooth function of the device.**
   If you make a Bluetooth connection from the device, proceed to step 6.

2. **Press \(\text{\textbullet}\) to display the phone menu.**

3. **Turn the M.C. dial to select \[BT SETTING\], then press to confirm.**

4. **Turn the M.C. dial to select \[ADD DEVICE\], then press to confirm.**
   The unit starts to search for available devices, then displays them in the device list.
   - To cancel searching, press the M.C. dial.
   - If the desired device is not in the list, select \[RE-SEARCH\].
   - If there is no device available, \[NOT FOUND\] appears in the display.

5. **Turn the M.C. dial to select a device from the device list, then press to confirm.**
   Press and hold the M.C. dial to switch the displayed device information between the Bluetooth device address and device name.
   If you make a Bluetooth connection from the unit, proceed to step 7.

6. **Select \[Pioneer BT Unit\] shown in the device display.**

7. **Make sure the same 6-digit number appears on this unit and the device, then select “Yes” on the device.**

**NOTES**
- \[DEVICE FULL\] appears if the unit has already been paired with ten other devices. In this case, delete one of the paired devices. See \[DEL DEVICE\] in the Bluetooth settings (page 17).
- Depending on the device, the PIN code is required in step 7. In this case, input \[0000\].

**TIP**
The Bluetooth connection can be also made by detecting the unit from the Bluetooth device. To do so, \[VISIBLE\] in the Bluetooth settings needs to be set to \[ON\]. For details on Bluetooth device operations, refer to the operating instructions supplied with the Bluetooth device.

**Parental Control**

Some SiriusXM channels contain mature content. You can lock these channels. For details, see [PARENTAL CTRL] in SiriusXM settings (page 35).

**Using Pioneer ARC APP**

You can operate the unit from Pioneer ARC APP installed on an iPhone/Android device. In some cases, you can control aspects of the application, such as source selection, pause, etc., by using the unit.

For details on what operations are available on the application, see the application’s help section.
WARNING

Do not attempt to operate the application while driving. Make sure to pull off the road and park your vehicle in a safe location before attempting to use the controls on the application.

For iPhone users
This function is compatible with iPhones (iPhone 5 or later) installed with iOS 8.0 or later. You can download Pioneer ARC APP on iTunes App Store.

For Android device users
This function is compatible with devices that have Android OS 4.1 or later installed and also support AOA (Android Open Accessory) 2.0. You can download Pioneer ARC APP on Google Play.

NOTE
Some Android devices connected via AOA 2.0 may not work properly or emit sounds due to their own software design, regardless of the OS version.

Making a connection with Pioneer ARC APP

1 Connect this unit with the mobile device.
   • iPhone/Android device via USB (page 13)
   • iPhone/Android device via Bluetooth (page 16)

2 Press the M.C. dial to display the main menu.

Connections/Installation

Connections

In the following, "NW" represents network mode and "STD" represents standard mode. According to the connections you have established, change the speaker mode to standard mode (STD) or network mode (NW) (page 11).

⚠️ WARNING

- When speaker output is used by 4 channels, use speakers over 50 W (maximum input power) and between 4 Ω to 8 Ω (impedance value). Do not use 1 Ω to 3 Ω speakers for this unit.
- When rear speaker output is used by 2 Ω of subwoofer, use speakers over 70 W (maximum input power).

* Please refer to connections for a connection method.
- The black cable is ground. When installing this unit or power amp (sold separately), make sure to connect the ground wire first. Ensure that the ground wire is properly connected to metal parts of the car’s body. The ground wire of the power amp and the one of this unit or any other device must be connected to the car separately with different screws. If the screw for the ground wire loosens or falls out, it could result in fire, generation of smoke or malfunction.

*1 Not supplied for this unit

🔄 Important

- When installing this unit in a vehicle without an ACC (accessory) position on the ignition switch, failure to connect the red cable to the terminal that detects operation of the ignition key may result in battery drain.

ACC position

No ACC position

- Use this unit with a 12-volt battery and negative grounding only. Failure to do so may result in a fire or malfunction.
- To prevent a short-circuit, overheating or malfunction, be sure to follow the directions below.
  – Disconnect the negative terminal of the battery before installation.
  – Secure the wiring with cable clamps or adhesive tape. Wrap adhesive tape around wiring that comes into contact with metal parts to protect the wiring.
  – Place all cables away from moving parts, such as the shift lever and seat rails.
  – Place all cables away from hot places, such as near the heater outlet.
Do not connect the yellow cable to the battery by passing it through the hole to the engine compartment.

Cover any disconnected cable connectors with insulating tape.

Do not shorten any cables.

Never cut the insulation of the power cable of this unit in order to share the power with other devices. The current capacity of the cable is limited.

Use a fuse of the rating prescribed.

Never wire the negative speaker cable directly to ground.

Never band together negative cables of multiple speakers.

When this unit is on, control signals are sent through the blue/white cable. Connect this cable to the system remote control of an external power amp or the vehicle’s auto-antenna relay control terminal (max. 300mA 12 V DC). If the vehicle is equipped with a glass antenna, connect it to the antenna booster power supply terminal.

Never connect the blue/white cable to the power terminal of an external power amp. Also, never connect it to the power terminal of the auto antenna. Doing so may result in battery drain or a malfunction.

The graphical symbol \[ \text{\textbullet} \] placed on the product means direct current.

**This unit**

- Microphone 3 m (9 ft. 10-1/8 in.)
- SiriusXM Connect Vehicle Tuner input
- Power cord input
- Microphone input
- Rear output (STD) or middle range output (NW)
- Front output (STD) or high range output (NW)
- Antenna input
- Fuse (10 A)
- Wired remote input
- Hard-wired remote control adapter can be connected (sold separately)
- Subwoofer output
- SiriusXM Connect Vehicle Tuner (sold separately)

**Power cord**

Perform these connections when not connecting a rear speaker or middle range speaker lead to a subwoofer.

Perform these connections when using a subwoofer without the optional amplifier.
Important
In the case of above, two 4 Ω subwoofers wired in parallel will represent a 2 Ω load.

   Connect to the constant 12 V supply terminal.
16. Red
   Connect to terminal controlled by the ignition switch (12 V DC).
17. Blue/white

Connect to the system control terminal of the power amp or auto-antenna relay control terminal (max. 300 mA 12 V DC).
18. Subwoofer (4 Ω)
19. When using a subwoofer of 2 Ω, be sure to connect the subwoofer to the violet and violet/black leads of this unit. Do not connect anything to the green and green/black leads.
20. Not used.
21. Subwoofer (4 Ω) × 2
22. Orange/white
   Connect to a car’s illumination signal.

Power amp (sold separately)
Perform these connections when using the optional amplifier.

1. System remote control
   Connect to blue/white cable.
2. Power amp (sold separately)
3. Connect with RCA cables (sold separately)
4. To rear output (STD) or middle range output (NW)

7. Front speaker (STD) or high range speaker (NW)
8. To subwoofer output
9. Subwoofer
Installation

Important
• Check all connections and systems before final installation.
• Do not use unauthorized parts as this may cause malfunctions.
• Consult your dealer if installation requires drilling of holes or other modifications to the vehicle.
• Do not install this unit where:
  – it may interfere with operation of the vehicle.
  – it may cause injury to a passenger as a result of a sudden stop.
• Install this unit away from hot places such as near the heater outlet.
• Optimum performance is obtained when the unit is installed at an angle of less than 60°.
• When installing, to ensure proper heat dispersal when using this unit, make sure you leave ample space behind the rear panel and wrap any loose cables so they are not blocking the vents.

DIN mount installation
1 Insert the supplied mounting sleeve into the dashboard.
2 Secure the mounting sleeve by using a screwdriver to bend the metal tabs (90°) into place.

When not using the supplied mounting sleeve
1 Determine the appropriate position where the holes on the bracket and the side of the unit match.
2 Tighten two screws on each side.

Removing the unit (installed with the supplied mounting sleeve)
1 Remove the trim ring.
Releasing the front panel allows easier access to the trim ring.

When reattaching the trim ring, point the side with the notched tab down.

2 Insert the supplied extraction keys into both sides of the unit until they click into place.

3 Pull the unit out of the dashboard.

To secure the front panel

The front panel can be secured with the supplied screw.

Installing the microphone

The microphone should be placed directly in front of the driver at a suitable distance to pick up their voice clearly.

⚠️ CAUTION

It is extremely dangerous to allow the microphone lead to become wound around the steering column or shift lever. Be sure to install the microphone in such a way that it will not obstruct driving. It is recommended to use the clamps (sold separately) to arrange the lead.

NOTE

Depending on the vehicle model, the microphone cable length may be too short when you mount the microphone on the sun visor. In such cases, install the microphone on the steering column.

To install on the sun visor

1 Fit the microphone lead into the groove.

2 Install the microphone clip on the sun visor.

Lowering the sun visor reduces the voice recognition rate.

To install on the steering column

1 Slide the microphone base to detach it from the microphone clip.
2 Install the microphone on the rear side of the steering column.

Troubleshooting

The display automatically returns to the normal display.
→ No operations have been made for about 30 seconds.
   – Perform an operation.

The repeat play range changes unexpectedly.
→ Depending on the repeat play range, the selected range may change when another folder or track is being selected or during fast forwarding/reversing.
   – Select the repeat play range again.

A subfolder is not played back.
→ Subfolders cannot be played when [FLD] (folder repeat) is selected.
   – Select another repeat play range.

The sound is intermittent.
→ You are using a device, such as a cellular phone, that may cause audible interference.
   – Move electrical devices that may be causing the interference away from the unit.

The sound from the Bluetooth audio source is not played back.
→ There is a call in progress on a Bluetooth-connected cellular phone.
   – The sound will be played back when the call is terminated.
→ A Bluetooth-connected cellular phone is currently being operated.
   – Stop using the cellular phone.
→ The connection between the unit and the cellular phone is not established correctly after a call made by a Bluetooth-connected cellular phone.
   – Make a Bluetooth connection between the unit and the cellular phone again.

Error messages

Common

AMP ERROR
→ This unit fails to operate or the speaker connection is incorrect.
   → The protective circuit is activated.
      – Check the speaker connection.
      – Turn the ignition switch OFF and back to ON again. If the message remains, contact your dealer or an authorized Pioneer Service Station for assistance.

NO XXXX (NO TITLE, for example)

**Handling guidelines**

**Discs and player**
- Use only discs that feature either of the following two logos.
- Use 12-cm discs.
- Use only conventional, fully circular discs.
- The following types of discs cannot be used with this unit:
  – DualDiscs
  – 8-cm discs: Attempts to use such discs with an adaptor may cause the unit to malfunction.
  – Oddly shaped discs
  – Discs other than CDs
  – Damaged discs, including discs that are cracked, chipped or warped
  – CD-R/RW discs that have not been finalized
- Do not write on or apply chemicals to the surface of the discs.
- To clean a CD, wipe the disc with a soft cloth outward from the center.
- Condensation may temporarily impair the player's performance. Let it rest for about one hour to adjust to a warmer temperature. Also, wipe any damp discs off with a soft cloth.
- When using discs that can be printed on label surfaces, check the instructions and the warnings of the discs. Depending on the discs, inserting and ejecting may not be possible. Using such discs may result in damage to this equipment.
- Do not attach commercially available labels or other materials to the discs.
  – The discs may warp making the disc unplayable.
  – The labels may come off during playback and prevent ejection of the discs, which may result in damage to the equipment.

**USB storage device**
- Connections via USB hubs are not supported.
- Firmly secure the USB storage device before driving. Do not let the USB storage device fall onto the floor, where it may become jammed under the brake or accelerator pedal.
- Depending on the USB storage device, the following problems may occur.
  – Operations may vary.
  – The storage device may not be recognized.
  – Files may not be played back properly.
  – The device may cause audible interference when you are listening to the radio.

**iPhone**
- Do not leave the iPhone in places with high temperatures.
- Firmly secure the iPhone when driving. Do not let the iPhone fall onto the floor, where it may become jammed under the brake or accelerator pedal.
- Incompatible text saved on the iPhone will not be displayed by the unit.

**Compressed audio compatibility**
- Only the first 32 characters can be displayed as a file name (including the file extension) or a folder name.
• The unit may not work properly depending on the application used to encode WMA files.
• There may be a slight delay at the start of the playback of audio files embedded with image data, or audio files stored on a USB device with numerous folder hierarchies.

⚠️ CAUTION
• Pioneer cannot guarantee compatibility with all USB mass storage devices, and assumes no responsibility for any loss of data on media players, smartphones, or other devices while using this product.
• Do not leave discs or a USB storage device in any place that is subject to high temperatures.

### iPhone compatibility

This unit supports only the following iPhone models. Supported iPhone software versions are shown below. Older versions may not be supported.

- iPhone 7
- iPhone 7 Plus
- iPhone SE
- iPhone 6s
- iPhone 6s Plus
- iPhone 6
- iPhone 6 Plus
- iPhone 5s
- iPhone 5c
- iPhone 5

- Operations may vary depending on the generation and/or software version of the iPhone.
- Users of iPhone with the Lightning Connector should use the Lightning to USB Cable (supplied with iPhone).
- Refer to the iPhone manuals for information about the file/format compatibility.
- Audiobook, Podcast: Compatible

**CAUTION**

Pioneer accepts no responsibility for data lost on the iPhone, even if that data is lost while this unit is used.

### Sequence of audio files

The user cannot assign folder numbers and specify playback sequences with this unit. Sequence of audio file depends on the connected device. Note that the hidden files in a USB device cannot be played back.
