

Audio Streaming

Audio streaming [A2DP] is an audio protocol of Bluetooth technology. This profile allows for audio to be streamed wirelessly from your compatible device, such as a Smartphone, to the source unit so you can enjoy your favorite music or streaming music service such as Pandora or Spotify, wirelessly.

Aux Input

The Aux Input allows you to connect to the audio output of an external device such as an MP3 Player or Smartphone so you can enjoy your music through your system.

Bluetooth

Allows our Bluetooth equipped source units to make wireless hands-free calls when paired with a Bluetooth equipped Smartphone. Communicate via the built in microphone on most of our units [or external microphone if provided] and listen thru your car's speakers.

Built-In DVD Player

The built-in DVD player lets you play DVD, CD, MP3, MP4, VCD, JPEG and WMA formatted discs through this system.

Built-in Preset EQ

The built-in, Preset EQ allows you to chose from preset EQ curves for a variety of music styles such as Rock or POP.

ESP

ESP [Electronic skip protection] is a feature that buffers the CD while playing, storing 5 seconds of music. If disc reading is interrupted, the player momentarily uses the stored data, while the tracking circuitry finds the passage prior to the interruption on the CD for continuous performance.

ID3 TAG

ID3 Tag allows the audio file to store and display additional data such as title, artist, album, track number and more.

AV Input

The AV Input allows you to connect to the video and/or audio output of an external device so you can enjoy your audio and video content through your system.

Rear Camera Input

The Rear Camera Input is a safety and convenience feature. When you shift your vehicle into reverse, the unit automatically powers on a rear view camera [sold separately] and switches the display to show what the camera sees.

SD Memory Card Port

The SD Memory Card port will support a full size SD memory card to 32 GB and can be used for music playback as well as photo and video viewing (on source units equipped with a monitor). Most units support full size SD cards but there are a few that only accept micro SD cards.

Steering Wheel Controls (SWC)

Our Steering Wheel Control-compatible units allow you to control the functions of the radio from the buttons on your steering wheel (if equipped). This provides convenience and safety by allowing you to keep your hands on the wheel. An additional interface is required and sold separately. We recommend the Metra ASWC.

Touchscreen Control

Our touchscreen panels give you access to the unit's control functions by simply touching the function you want to use.

USB Charging

Built-in 1A charger allows you to charge your USB connected device thru this units USB port.

USB Playback

The USB port will support a USB flash drive up to 32 GB and can be used for music playback as well as photo and video viewing (on source units equipped with a monitor). Some units have a mini USB input but come with the adapter to convert to be able to play full size USB drives.

Video Output

Video RCA Output allows you to connect directly from your source unit to the video input of external monitor(s), such as headrest or overhead monitors. If you plan on using multiple video monitors, we recommend using a video signal amplifier to boost the signal for optimum picture quality.

Built-In Navigation

An easy to use GUI with the maps of all 50 states and Puerto Rico plus Point of Interest all preloaded. Features text to speech technology to give you not only visual but also voice turn by turn guidance.

RDS Tuner

Radio Data System (RDS) provides information on the radio display such as the Call Name of the station, Programing format and allows a broadcaster to send up to a 64 character message that could scroll things like sports scores, song titles, artist or album names, traffic and news across your radio's display.

Wireless App Control

Allows you full wireless control over a majority of the functions of this unit from your Android Smartphone via Bluetooth. Download the app from the Google Play Store.

Wireless Remote Control

A wireless remote control gives you commanding access to the key functions of your unit from the palm of your hand.
