3pc Xtreme Lip Technology Series

Xtreme Lip Technology, extend 6061 T6 lip forging process. This allows increase up to an additional 2 inches on the lip compared to conventional forging. Our patented center profile offers truly extreme design. The center is cut with precision 3D.T. (3-Dimension Tilt) machine processing technology.

Available: Optional Custom Finishes / Custom Fitment.

Available Sizes: 19", 20", 22", 24"

3D.T. TECHNOLOGY

Savini Introduces yet another revolutionary design to exceed other conventional 3 Piece wheel Design.

3D.T. Technology (3-Dimension Tilt Tech.) utilizes 5-Axis CNC machine to cut angles where no conventional 2-D 3 Axis can manufacture. The design of a wheel is cut not only from the face surface but it also utilizes the side of the spoke in Multi-Surface cutting with 3D.T. Technology. Savini R&D department has developed this method so that any customers can now expand on their optional finishes in 3-Dimension.
