## AGM RECHARGEABLE BATTERIES

### AGM TECHNOLOGY

Shuriken batteries can be found powering anything from motorcycles and cabin cruisers to competition audio systems. Shuriken provides the constant voltage needed for optimum sound quality and other uses. These batteries all use Absorbed Glass Matte (AGM) technology and are fully charged, ready to use direct from the factory. They are non-spillable and maintenance free. Because of the AGM design, they can be discharged and recharged hundreds of times with a one-year replacement warranty.

### PREMIUM QUALITY

Shuriken offers batteries for Reserve Power Cell, Marine/RV and PowerSports applications. The PowerSports batteries are designed to fit all of the most popular applications based on today's BCI and JIS fitment standards. Perfect for replacing factory batteries in motorcycle, ATV, UTV, marine and RV applications.

The Shuriken batteries are extremely resistant to excessive heat and strong vibration. With super-low ESR and closely packed pure lead plates, each battery packs a real punch. Shuriken Reserve Power Cells are designed to deliver the winning edge at SPL competitions while providing the consistent backup power needed for powerful car stereo systems, especially when parked for parties and shows.

Shuriken continues to be a complete battery supplier and your one stop shop for your battery needs.
