AXLE MODEL GUIDE

DRIVETRAIN PRODUCTS

Applications include:
4x4/Off-Road, Diesel, Street, Strip, and Track.

PERFORMANCE THAT BEGINS
WHERE THE PAVEMENT ENDS.

THE
ULTIMATE
FOR THE JEEP® WRANGLER® JK

THE ULTIMATE DANA 60™ FRONT & REAR AXLES for the JEEP® WRANGLER® JK

For years, hardcore Jeep rock climbers and off-roaders have been modifying their vehicles and axles for even better performance over the rocks, across the sand, and through the mud. The Ultimate Dana 60™ front and rear axles are the biggest, strongest axles you can get under your vehicle, built to withstand even the toughest terrain.

UNLEASH

THE PERFORMANCE IN YOUR VEHICLE

From the punishing speeds of the circle track to the brutal terrain of off-road, Dana understands what it means to push the boundaries. Spicer and SVL aftermarket drivetrain products are trusted by the experts, wherever limits are tested and parts are proven. And with the innovative new Dana Crate Axle™ program, you get the original equipment quality you demand from genuine Dana axles straight out of the box. We engineer our parts to deliver peak performance and optimum strength, so you can hit the road, the track, or the trail with the confidence that comes from knowing you are backed by the industry leaders in high-performance parts.

WHY DANA AFTERMARKET PARTS?

- Dana offers two strong brands, genuine Spicer® and SVL® all-makes, both of which deliver the best performance in their categories.
- Spicer parts are manufactured to the highest standards of premium performance and the quality you expect from Dana.
- SVL parts are engineered to meet the aftermarket product requirements of Dana, the most trusted name in drivetrain products.

SPICER

RING AND PINION GEARING

Quiet, Durable, Easy to Set Up Gearing.

Get the benefits of precision-machined gearing for your Dana axles, including a smoother, quieter ride and up to double the life of non-genuine parts. Our statistically controlled processes make the difference:

- **Heat Treatment** for optimal hardness and increase durability
- **Face Hobbing** to ensure precise mating of gear teeth, so you get a quieter ride
- **Shot Peening** to double the fatigue life of the gear
- **Lapping** to reduce noise and heat

SVL[®]

RING AND PINION GEARING

Coverage for All Makes of Vehicles.

Backed by Dana, SVL[®] products are the best-in-category choice for reliable performance, engineered to meet your need for coverage, quality, and affordable gearing. The current SVL line also features reliable universal joints, manufactured to consistently outperform the leading non-genuine brands.

- Expanded ratios for all-makes coverage
- Expanded ratios available for Dana axles
- Designed with precision engineering
- Dana-validated and approved for quality and durability

STANDARD AND MASTER DIFFERENTIAL REBUILD KITS

Standard Axle Bearing Kits

Not all bearings are created equal. Choose Spicer Axle Bearing Kits for just the right repair. Each kit comes with the exact combination of parts you need to get your axle back in shape and on the road.

Standard Axle Bearing Kits Include:

- Pinion Head & Tail Bearings
- Differential Bearings
- Pinion Seal
- Pinion Nut
- Collapsible Spacer (where applicable)
- RTV Sealant

Master Axle Overhaul Kits

Our most comprehensive kit—complete with everything you need for a thorough and lasting repair.

- The highest quality mix of bearings, cups, and cones, each precisely selected for maximum performance in every position and application.
- Premium oil seals for your best protection against nagging leaks and damaging contamination.
- All the small parts to do the job right, including sealant, snap rings, gaskets, shims, and more.
- Production upgrades that ensure genuine Spicer parts are as good as—or better than—the OE parts they replace.

Master Overhaul Kits Include:

- Pinion Head & Tail Bearings
- Differential Bearings
- Pinion Seal
- Pinion Nut
- Pinion Adjusting Shims
- Differential Adjusting Shims
- Ring Gear Bolts
- Collapsible Spacer
- RTV Sealant

SPICER

FRONT AXLE SHAFTS FOR THE JEEP JK

Upgraded Dana 30™ and Dana 44™ Axles for Jeep JK Drivers.

Today's Jeep owners are customizing their vehicles with larger tires that stand up to rough terrain. They want larger universal joints and an even stronger axle shaft for their Dana 30 and Dana 44.

These upgraded front axle shafts deliver with these design improvements:

Upgrades made to Dana 30 and Dana 44 axles

- Designed for larger tires and off-road use

U-joint size increased from 1310 to 1350 series

- 25% higher yield strength
- U-joint sealing package upgraded to Spicer Life Series® (SPL®)

Unparalleled strength and longer life

- Fatigue life improved by 300%
- 2000% improvement in high-angle fatigue life

Outer stub design re-engineered for added strength

- Improved snap retention for increased shock loading
- Material added to yoke ears and removed from body to equalize deflection through yoke and reduce bearing cap spinning
- Micro-alloy improves strength of shaft

See the "Front Axle Shaft" section of this catalog for addition year, make, and model coverage.

SPICER

NICKEL CHROMOLY STEEL AXLE SHAFTS

Not All Chromoly Shafts are Alike.

At Dana, we've engineered the SAE-4340 nickel chromoly axle shaft to exceed OE standards and meet the exacting demands of off-road. Hit the trail with the confidence that comes from knowing you are backed by the global leaders in driveline products. Engineered to deliver added strength and durability, these genuine Spicer axle shafts are one more example of the innovations that we bring to performance applications.

See the features and benefits of our high-performance axle shafts, including:

SAE-4340 nickel chromoly steel construction

- For ideal hardness throughout the part
 - Nickel provides additional toughness
 - Chromium ensures high-temperature strength and resistance to abrasion
 - Molybdenum helps maintain a specified hardenability

Heat treatment processes

- Delivering the same surface hardness and case hardness, while achieving a higher core hardness for greater strength

Optimized for high-performance strength and durability

Find out more about Spicer axle shafts, as well as a range of products engineered for performance applications.

SPICER

REAR AXLE SHAFTS

100% Genuine Quality. Tested and Proven.

- Ultrasonically tested for internal cracks that magnetic testing can miss
- Tested for straightness within rigorous range specifications
- Engineered for consistent quality and durability
- Built from a grade of steel that stands up to any grade on the market
- Complete repair solution, including studs, bearings, and seals where applicable

SVL

REAR AXLE SHAFTS

Available for All Makes. Backed by Dana.

Available for a wide range of applications, including hard-to-find models, SVL rear axle shafts are the only products in their category to earn the approval of Dana, the most trusted name in driveline components. SVL parts combine strength and durability, as well as a blend of coverage, performance, and value.

See the features and benefits of our SVL rear axle shafts, including:

- Manufactured from SAE-1541 steel
- Precision heat-treated for optimal hardness and durability
- Rolled or cut splines depending on application
- Meets Dana's aftermarket requirements for:
 - Static ultimate strength
 - Torsional fatigue
 - Rotating/bending torque

In addition to SVL rear axle shafts, Dana also offers a line of SVL universal joints, center bearings, ring and pinion gearing, and inner gear kits with coverage for all makes of vehicles.

Talk to your SVL parts representative today for more information.

THE ULTIMATE

FRONT AXLES FOR THE JEEP® WRANGLER® JK

Made in
USA

Added Features for Added Confidence.

For years, hardcore off-roaders have been modifying their Dana 60™ axles for even better performance. Here at Dana, we're paying attention. We have incorporated a number of new features into the Ultimate Dana 60™ axle, including chromoly axle shafts, massive new Spicer® SPL®-70 u-joints, and more.

- Massive Spicer® SPL®-70 u-joints—exclusive to Dana
 - Providing optimal performance for lifted vehicles with larger tires
 - Improved “rock solid” seals for optimal protection from environmental contamination
 - Manufactured from cold-forged steel
 - Providing for higher torque load
- Spicer® 35 spline SAE-4340 nickel chromoly steel axle shafts
 - Designed for larger tires and off-road punishment
 - Ensuring maximum strength and durability
- Warn® 35 spline hub locks
- Dead spindle design
 - Ensuring additional strength
 - Allowing for wheel bearings to be serviced individually
 - Easier to repair and service than unit bearing design
- High-strength, heavy gauge brackets
 - Additional durability where it matters the most
 - Skid plate incorporated into lower control arm bracket
- High-clearance carrier with ribbed housing design
 - Cover face rotated back for greater ground clearance
 - Reinforced ribbing on bottom of carrier to prevent hang-ups on rocks or rough terrain
- Selectable electronic locking differentials
 - Precision-forged gears offer ideal meshing, strength and durability
- Heavy-duty 8 x 6.5" wheel bolt pattern
- Nodular iron diff cover with protective ribbing
 - Raised fill plug for increased fluid capacity due to increased pinion angles
- Upper and lower control arms in same location as OE
 - Better fit, less adjustment on control arm
 - Optimal articulation
 - Easy to install
 - Cast-in upper control mount for added strength and durability
- Genuine Made in the USA Spicer® 10" (256 mm) ring and pinion gear
 - Available ratios include 4.88 and 5.38
 - Precision heat treated for optimal hardness and durability
 - Face hobbled for precise mating of gear teeth and a quieter ride
 - Shot peened for double the fatigue life
 - Lapped to reduce noise and heat
- Spicer® 1350 Strap-style/Half-round end yoke
 - Provides added strength
- Axle tubes: 3½" tube diameter/.370" wall thickness
 - Offers superior strength
 - Helps prevent steering from being knocked out of alignment
- Upgraded heavy-duty brakes with plug-and-play ABS system
 - Massive vented rotors (360mm O.D.) and dual piston calipers for optimal braking power and optimal cooling

REAR AXLES FOR THE JEEP® WRANGLER® JK

Made in USA

Full-Float Design. Full-On Strength.

When you're taking on the roughest terrain, you need the biggest, strongest axles available. You need the Ultimate Dana 60™ axle. Engineered to be a direct-fit, bolt-in solution for the Jeep Wrangler JK, the Ultimate Dana 60™ axles can withstand the extreme punishment of extreme off-roading. Built for superior strength inside and out, these axles have what it takes to overcome even the toughest obstacles.

- Full-float design
 - Vehicle weight carried by housing instead of shaft
 - Delivers greater load-carrying ability
- 35 spline SAE-4340 nickel chromoly steel axle shafts
- Selectable electronic locking differentials
- Upgraded heavy-duty brakes with plug-and-play ABS system
 - Massive vented rotors (358mm O.D.) and dual piston calipers for optimal braking power and optimal cooling
- Genuine Made in the USA Spicer 9¾" (248 mm) ring and pinion gear inside
- Spicer® 1350 Strap-style/Half-round end yoke
- Axle tubes: 3½" outside diameter/.390" wall thickness
- Heavy-duty 8 x 6.5" wheel bolt pattern
- Heavy-duty brackets
- Nodular iron diff cover

THE ULTIMATE

FRONT AXLES FOR THE JEEP® WRANGLER® JK

In-Demand Modifications Built Right In.

Engineered for all Jeep® Wrangler® JKs, 2007 to current, the Ultimate Dana 44™ axle is a direct bolt-in solution. The Ultimate Dana 44™ axle requires use of your existing wheel ends. Featuring a number of upgrades for added on-trail durability, the Ultimate Dana 44™ axle is built to meet the demands of serious off-road enthusiasts.

- Thicker tubes
 - 5/16" thick for improved strength, rigidity, and durability
- Redesigned and thicker brackets
 - 1/4" steel to resist bending and endure the off-road environment
 - Works with most lift kits
- Upper and lower control arms in same location as OE
- Spicer® nickel chromoly axle shafts for optimal strength and performance
- Spicer Life Series® SPL® 1350-series u-joint with triple lip seals and full-circle clips for ultimate protection against the elements
- High-strength nodular iron performance differential cover and Spicer® performance gasket
 - Providing enhanced sealing and protection from off-road hazards
- Selectable electronic locking differentials
 - Harness sold separately
- Genuine Spicer® gearing
 - Precision design and manufacturing processes provide ultimate gear mating for optimal strength, life, and quiet performance
 - Expanded aftermarket gear ratios: 3.73, 4.10, 4.56, 4.88, 5.13, and 5.38
- Pinion angle optimized for lifted vehicles
- Increased gross axle weight rating (GAWR) allows for the added weight of suspension upgrades, bumpers, winches, and larger tires
- Improved caster angle for lifted Jeeps®
 - Reduces "bump steer"
- Dana recommends using military-tested and approved 75W-140 synthetic lube (not included)
 - Provides premium performance and reliability in the toughest environments

Built with genuine Spicer products.

SPICER

DIFF CARRIER CASE ASSEMBLIES

Made in USA

Strength and Durability Across Multiple Configurations.

For years, Spicer® differential case assemblies have delivered an effective solution across a range of applications, and we have made continuous improvements to ensure even better performance.

- Near-net formed spider gears engineered to be stronger than ever
- Assembly case built from a stronger grade of steel
- Available for open and limited slip differentials
- Built to meet OE standards set by Dana

**COMPLETE
LOADED
ASSEMBLY**

SVL®

DIFFERENTIAL ASSEMBLY CASE

Coverage for All Makes of Vehicles.

With SVL differential cases, you now have everything you need to replace your differential—and rest assured that your parts are backed by the global leader, Dana. With coverage for all makes, you're sure to find a part that's right for your vehicle. Take advantage of the coverage, value, and performance that SVL offers.

- Unloaded: available for open and limited slip differentials
- All-makes coverage

SPICER

INNER GEAR KIT

Near-Net Forged for Longer Life in Dana Axles.

- Everything you need to rebuild your diff case
- The only inner gear kit engineered to Dana specifications
- Forged to ensure greater strength and increased durability, without the stress risers that come from cutting gears

SVL[®]

INNER GEAR KITS

All-Makes Coverage. A Complete Differential Case Rebuild. Backed by Dana.

With SVL inner gear kits, you can get everything you need to rebuild your diff case, and you can rest assured that the parts you purchase are backed by Dana, the worldwide leader in driveline components. Save time and money by ordering all your parts from one supplier, and take advantage of the coverage, value, and performance that SVL is known for.

Features and Benefits:

- Phosphate coating on cross shaft
- Statistically controlled heat treating
- Product analysis
- Testing to meet aftermarket specifications for:
 - Case depth
 - Core hardness
 - Microstructure
 - Materials
 - Coatings

Parts include:

- Diff gears
- Side gears
- Hardware
- Thrust washers
- Cross shaft

SPICER

HIGH-PERFORMANCE GASKET

Made in USA

Easily Installed. Instantly Sealed.

Tired of using paper differential gaskets? Spicer has the solution.

- High-performance gaskets for maximum durability
- Anti-stick coating on the outside
- Woven steel core at the center
- Easy repair when you are in the field

SPICER

PERFORMANCE DIFFERENTIAL COVERS

Wherever You Take Your Vehicle, We Have You Covered.

Keep your diff parts safe with Spicer differential covers, designed to meet the needs of any application.

Spicer® Performance Differential Cover for Off-Road

- Designed with an aggressive look to match trail-ready strength
- Manufactured from high-strength nodular iron
- Built with ribbing to protect components off-road
- Ensures greater housing rigidity
- Enhances the look of your undercarriage
- Raised fill plug for increased fluid capacity on high pinion angles
- Includes hardware and drain plug
- Includes Spicer Performance Gasket
- OE standard cover also available

SPICER

THIRD MEMBER FOR FORD 9" APPLICATIONS

Two Options. One Brand. Maximum Performance.

Wherever limits are tested, Dana is there with products engineered to meet the needs of off-roaders, racers, and more. We offer Spicer® parts designed to deliver the strength, power, and endurance that give performance vehicle drivers a competitive edge. The Spicer third member is one more example, with two quick-exchange options for your specific requirements.

Choose from: **Aluminum construction**

- Built from premium-grade aluminum
- Lightweight for circle track, street rod, and other racing applications

Nodular iron construction

- Heavy-duty iron

Both offer: **Fill plug**

- Built-in solution for easy maintenance

Billet adjuster nut

- Provides increased durability and strength

High-performance reusable gaskets

- Anti-stick coating on outside
- Woven steel core at the center
- Teflon coated for clean release

SPICER

SPICER LIFE SERIES® (SPL®) PREMIUM PERFORMANCE U-JOINT PACKS

Spicer® Parts Are There When You Hit The Trail—And When The Trail Hits Back.

No matter what conditions you throw at your 4WD vehicle, trust Spicer SPL® u-joints. SPL u-joints are designed for premium performance and include triple-lip seals for ultimate protection against the elements. The Spicer SPL Premium Performance Packs include one of each u-joint in your driveline, so you always have what you need when you are on the trail.

SPICER

DRIVESHAFTS FOR JEEP

Made in USA

Greater Strength. Less Vibration. Direct-Fit.

Get the direct drop-in replacement for your driveshaft.

- Featuring a thicker tube for added strength
- One-piece flange eliminates run-out and the need for an adapter
- Improved clearance to exhaust due to smaller diameter
- Slip length designed for a 2" to 4" vehicle lift
- Includes transercase, half-round conversion yoke and hardware

Direct-fit, bolt-in replacement

SPICER

ONE-PIECE ALUMINUM DRIVESHAFTS FOR THE FORD MUSTANG

Made in USA

Lighter Weight for a Smoother, Quieter Ride.

- Reduces overall weight and rotating mass of the driveline for better acceleration
- Eliminates the need for a center bearing
- Bolts directly to the OE Mustang flange, with no need for an adapter
- Available in 3.5" and 4" diameters
- 4" diameter allows for higher RPMs with less noise, vibration, and harshness
- Includes hardware

SPICER

PERFORMANCE SPOOLS

Spicer Parts. Built Tough for the Performance Market.

Spicer performance spools offer tremendous advantages for racing enthusiasts and hardcore off-roaders, providing features and benefits that standard differentials cannot offer. Spicer performance spools replace the need for a differential case, thus eliminating failures from high-torque, high-impact situations.

Forged from chromoly 4130 steel

- Provides optimal strength

Heat treated and metallurgically tested

- Ensures ideal hardness for performance applications

Available in lightweight versions

- Delivers lighter rotating mass

Available for all makes

Spicer spools are not recommended for everyday street driving, but they offer incredible benefits in performance applications.

SPICER

AXLE VENT BLADDER KIT

Quick Solutions. Spicer Quality.

Spicer axle vent bladder kits protect your axle and the environment whether you are off-road or on the track. As oil and vapor expand in your carrier, the axle vent bladder captures any oil blow-out and returns it to the axle.

- Engineered for a universal fit
- Designed to recirculate oil back to your axle
- Protects your axle from water and mud off-road

Spicer Part Number	Description	Applications
2022623	Axle Vent Bladder Kit	Universal

COMMON U-JOINT KITS BY SERIES

Once you've determined the driveshaft/u-joint series, the chart below provides options for easily identifying the appropriate Spicer® u-joint kit part number.

Vehicle Type	Driveshaft Series	Spicer® Service Kit (Greaseable unless noted)	Spicer Life® OE Kit (Greaseable)	Spicer Life® OE Kit (Non-Greaseable)

Axle General Information

How To Identify A Spicer Axle

All Spicer Carrier Type axles are identified with a manufacturing date (1) and Bill of Material number (2) stamped on the right or left hand tube on driving axles. The Bill of Material number may also be found on the carrier in some models as shown in illustration (2A). For independent front suspension (IFS) axles, the B/M number may be located at one of three locations: 1) A vertically positioned tag near the center of the right hand side support arm, 2) stamped into the left hand side support arm (opposite end of the camber adjuster), or 3) stamped into the "nose end" of the axle carrier. The location of the information will depend on the manufacturing date of the axle.

The axle model number will be cast into one of the webs as shown (3), or it can be on the nose.

Each axle contains a gear ratio tag (4), and if the axle is equipped with a limited slip differential, it will have a tag specifying the type of limited slip lubricant to be used (5).

Refer to the appropriate model number section for parts identification and a breakdown of the Bill of Material.

How To Change Gear Ratios

To increase or decrease a gear ratio, there are certain steps that must be taken. The differential case depends upon the ratio desired. For each axle model, there is a high-ratio and a low-ratio case as illustrated below:

Axle Model	Low Ratio Case	High Ratio Case	Axle Model	Low Ratio Case
High Ratio Case				
Model 27	3.73 and Down	3.92 and Up	Model 50	—
Model 28	3.45 and Down	3.73 and Up	Model 60	4.56 and Up
Model 28 IFS Aerostar	2.27, 3.73	—	Model 61	—
Model 30	3.55 and Down	3.73 and Up	Semi Float	3.00 and 3.07 only
Model 35	2.35 only	—	Model 61	—
Model 35	2.73 - 3.31	3.54 and Up	Full Float	3.31 and Down
Model 36 ICA	2.73 and Down	3.07 and Up	Model 70	4.10 and Down
Model 44	3.73 and Down	3.92 and Up	Model 70-3HD	3.42 and Down
Model 44 ICA	—	—	Model 70-2UA	3.07 only
1984 & earlier	3.73 and Down	3.92 and Up	Model 80	3.73 and Down
Model 44 ICA	—	—		4.10 and Up
1985 & later	2.87 and Down	3.07 and Up		

Example - If you have a model 44 Rear Axle with a 3.54 ratio and wish to change to a 3.73 ratio, you change only the ring gear and pinion assembly. If you change the ratio to a 4.09, you must change to a high-ratio case in addition to changing the ring gear and pinion. The application section will show you what case to use. When the vehicle is equipped with both front and rear driving axles, the gear ratios must be the same in both axles. **The drive gear screws are self-locking and must be replaced with new screws each time that they are removed.**

How Limited Slip Differentials Operate

A conventional differential transmits all the ring gear torque through the differential gears to the axle shafts. Torque is at all times equal on the axle shafts, and if one wheel slips, the other wheel can only put out as much torque as the slipping wheel.

The Spicer Limited Slip differential has the same power flow as a conventional differential, plus a more direct flow which automatically takes effect as driving conditions demand. This more direct power flow is from the differential case to each axle shaft through a clutch plate and disc arrangement.

Arrangement of these plates and discs is at the option of the vehicle manufacturer, so care should be taken during disassembly to note the arrangement of these components.

The Limited Slip construction permits differential action when required for turning corners and transmits equal torque to both wheels when driving straight ahead. However, when one wheel tries to spin due to leaving the ground, a patch of ice, etc., the clutch packs automatically provide more torque to the wheel which is not trying to spin.

The Limited Slip differential resists wheel spin on bumpy roads and provides more pulling power when one wheel tries to slip. In many cases of differences in traction, pulling power will be automatically provided until both wheels start to slip.

In diagnosis of vehicle operators' complaints, it is important to recognize two things.

1. If, with unequal traction, both wheels slip, the Limited Slip Differential has done all it can possibly do.
2. In extreme cases of differences in traction, the wheel with the least traction may spin after the Limited Slip has transferred as much torque as possible to the non-slipping wheel.

How To Distinguish a Powr-Lok™ from a Trac-Lok™

All Models **except Models 70/267 and 80/286**: The Powr-Lok design is identified by its 2-piece case. The Trac-Lok design is identified by its 1-piece case.

Models 70/267 and 80/286 only: Both the Powr-Lok and the Trac-Lok use 2-piece cases in the model 70 (267) and 80 (286) axle. The difference between the two is in the shape of the holes for the cross shaft. The Powr-Lok case will have cross shaft holes that are "U" shaped in one case half and "V" shaped in the other case half. The Trac-Lok case will have cross shaft holes that are semicircles in both case halves.

Model 80/286 only: It is also possible to replace an existing Powr-Lok unit with a complete Trac-Lok unit. For this purpose, the differential case assembly must be replaced.

**POWR-LOK™**

2-Piece Case

4 Pinion Mate Gears

**TRAC-LOK™**

1 or 2-Piece Case

2 or 4 Pinion Mate Gears
