BRING BACK THE SHINE TO YOUR FLEET!

ALL IN ONE WHEEL ACCESSORY KITS

Your fleet needs to represent your company with style and nothing brings out the best in your trucks like mirrored chrome wheel kits. We all know when it's time to shop for wheel accessories, the long list of part numbers and nut covers falling out of your pockets makes the process annoying. Trux's all-in-one wheel accessory kits cut down on in-store time, warehousing and inventory counts, so you can focus on more important things.

One box does one truck so no more losing or having to keep track of multiple items. Trux's wheel accessory kits are a universal fit that can be easily installed. These kits include high quality stainless or chromed steel front and rear hub caps, ABS chrome plastic nut covers, that add a finished look to your truck that can't be beat!

THUB-C1

KIT INCLUDES:

- 2 x Chrome ABS Plastic Front Axle Covers
- 4 x Chrome ABS Plastic Rear Axle Covers
- 60 x Chrome ABS Plastic Threaded 33mm Nut Covers
- 1 x Nut Cover Tool

THUB-C2

KIT INCLUDES:

- 2 x Chrome Metal 6 Notch Universal (Fits 6, 5, 4 Notch) Front Hubcaps
- 4 x Chrome Metal 8" I.D Rear Hubcaps
- 60 x Chrome ABS Plastic Push On 33mm Nut Covers

THUB-C3

VOLVO VN/VNL

PROJECTOR HEADLIGHT ASSEMBLIES

Gone are the days when we must decide between elite technology and uncompromising style. TRUX's latest range of Volvo Headlight Assemblies have fused innovation with aesthetics, becoming a must-have for drivers.

These ground-breaking headlight assemblies are designed with either standard halogen projector bulbs or powerful white projector LEDs. Plus, there's the option for a sleek black, or classic chrome interior, to match the look of your truck.

The most amazing new design feature are the two LED accents found on the bottom of the headlight assemblies. What makes these so special is that they're fitted with TRUX Dual Revolution technology; white LED daytime running lights that change into an amber turn signal. The Volvo series also has two white daytime halos surrounding the projectors as well, as an added innovative factor that cannot be beat!

Installation is as simple as it gets. The headlight assemblies are made to OEM specifications, with plug and play wiring, and most importantly, no programming needed! That means no extra expense at your dealer or your local garage.

FREIGHTLINER CASCADIA

LED PROJECTOR HEADLIGHT & FOG LIGHT ASSEMBLIES

Finally, the painful wait is over. The D.O.T. compliant, no-programming required, LED Headlight Assembly that every Cascadia owner has been waiting for, has arrived!

Thanks to the innovative LED projector technology, Trux's Cascadia headlights brilliantly illuminate the night, with a wide beam brightening the path and shoulder ahead. This most importantly, allows for a less strenuous and safer drive.

When driving in low light conditions, Trux Projector LED technology is crucial for maximum visibility and safety. The secret of this technology is the powerful Cree LEDs that face the back of the light, reflecting off a mirror, bouncing a wider, stronger beam pattern forward.

These headlights also feature Trux's Dual Revolution technology in the accent strips placed below the high and low beams. Their dual white daytime-running to turn signal LEDs introduce a refreshing aesthetic to the timeless design. Depending on the look you're going for, they're available in either sleek black or classic chrome housing.

TLED-H7: High Beam | 12-24v

2400 LUMENS

D.O.T. APPROVED

PREMIUM GRADE

The TRUX LED projector headlights are simply the most powerful forward lighting in the entire industry. The shine from these white lights are unmatched and will substantially increase your visibility, not only straightforward but to the sides of the road as well. The secret of LED projector technology is that powerful Cree LEDs face the back of the light and reflect off a mirror to bounce a wider and stronger beam pattern forward.

TLED-H2: Low Beam | 6-24v

TLED-H1: High Beam | 12-24v

670 LUMENS

D.O.T. APPROVED

STANDARD GRADE

TRUX standard grade LED headlights are perfect for fleets looking for a headlight significantly brighter than the standard halogens on the market. The upgrade relies on the fact that LED headlights are more reliable, efficient and illuminate a bright white light in comparison to halogen models that illuminate a dim yellow light.

LED beam patterns are twice as bright and wide compared to halogen lights. Performance wise, when compared to other competitors in the market with similar grade headlights, we made sure that ours are the brightest, for safety reasons and.... bragging rights.

TLED-H71: High & Low Beam | 9-32v

1200 LUMENS

Off-Road Use Only

ECONOMY GRADE

By popular demand, TRUX has created an economical level of LED headlights for those looking for safety while keeping money in their pocket.

This 4" x 6" model comes with high beam as well as the low beam integrated into one light, so you can now have four high beams running all at the same time.

This tier of headlights are NOT D.O.T. Compliant (they're actually too bright to pass) and are made for off-road use only.

LED BULB KITS

A BRIGHTER REPLACEMENT

MAXIMUM BRIGHTNESS
High Intensity Light Output

IDEAL LIGHT PATTERN
Adjustable Mechanism to achieve the best light pattern.
(For Bulb Types: H4, H7, H10, H13)

HEATSINK
State of the Art Heat Dissipation

Trux's LED Bulbs produce a **much brighter, more powerful, more concentrated white light**, allowing you to see more and be seen by others better than ever before.

LEDs light up approximately **10 times faster** than incandescent and halogen bulbs.

Trux's LED bulbs are **MORE energy efficient** and produce **LESS heat** than traditional bulbs; a win-win. The low heat reduces yellowing or cracking of the bulb.

Installation is **effortlessly simple**. The LEDs fit directly into original factory bulb sockets with no tweaking or adjusting required.

When properly equipped with decoders, these won't interfere with **CAN Bus data systems**.

'STELLAR' SERIES WORK LAMPS

DESIGNED TO FIT

CLASS 8 TRUCKS

HEAVY DUTY VEHICLES

SPORT UTILITY VEHICLES

ALL TERRAIN VEHICLES

RECREATIONAL VEHICLES

When the Trux 'Stellar' Series Work Lamps were just an idea on a page, the goal was straightforward: Strengthen and enhance visibility at a competitive price.

Trux understood that workspace and back up illumination is a necessity, so we wanted to maximize light that a work lamp could emit, to make any condition as safe and bright as possible. Trux set out to revolutionize work lamps and they achieved the result they were after; creating an economical, brighter, more powerful, 'Stellar' reality.

The ordinary LED work lamp has been transformed. By incorporating a vibrant ray of light that is complimented and enhanced by a reflective chrome interior, the brilliant white light is projected further than ever before. To prove it's not all talk, Trux put their new work lamps to the test against the competition, and the results were clear: Stellar Series Work Lamps shine BRIGHTER and WIDER compared to the leading competitor.

With a range of sizes, shapes and light output levels available, the Stellar Work Lamp Series are now establishing themselves as the industry's essential, cost-saving new LED work lamps!

Check out our comparison video below to see how the 'Stellar' Series LED Work Lamps outperforms against the leading competitor.

LEDs illuminate white **Flood or Spot Beam**, reducing eye strain

Chrome Interior amplifying the brilliant white light from the LEDs

Polycarbonate Lens providing great clarity with stronger durability than glass

IP67 Waterproof up to 1m of water for 30 minutes

High Rigid and Efficient Cooling **Aluminum Die-Cast Housing**

Work Lamps are compatible with **12V-24V Vehicles** (unless specified)

Adjustable **Stainless Steel Mounting Brackets** offering the flexibility to adjust the lighting

STRETCHING POSSIBILITIES

What do you get when you combine a light bar with a Stellar Series work lamp? The answer, a sleek and stylish 1080 lumen, 6 inch, 6 diode, versatile lighting superstar!

Whether it's a Truck, ATV, SUV, Jeep, Heavy Duty machine or Boat, the Single Row Stellar lamps, available in flood or spot beam, will light your path and make your vehicle shine.

PART NO.	DESCRIPTION	LEDS	LUMENS
TLED-U97	Universal Rectangular High Powered LED Work Lamps (Spot Beam)	6	1080
TLED-U98	Universal Rectangular High Powered LED Work Lamps (Flood Beam)	6	1080

GOOD THINGS IN SMALL PACKAGES

Size is not always what matters. The 3 inch mini LED 'Stellar' work lamp series from TRUX allows you to see more, with greater flexibility to install in tighter places.

These LED work lamps are anything but a downgrade when it comes to quality and design, made with the same aluminum die cast housing and polycarbonate lens that is found on all TRUX LED work lamps.

PART NO.	DESCRIPTION	LEDS	LUMENS
TLED-U87	Mini High Powered Round LED Work Lamp (Spot Beam)	5	1200

TLED-U90	Mini High Powered Square LED Work Lamp (Flood Beam)	5	1200

THE SHOW STOPPER

When it comes to packing a punch, the 4 inch Stellar Work Lamps do just that, and more!

1350 lumens, 9 diodes, and a reflective chrome interior work in unison to brilliantly light up any work area, with the option for either spot or flood beam.

Knowing this, and considering the waterproof, durable flexible exterior, and you've got a clear winner for any situation.

BACK UP

WITH CONFIDENCE

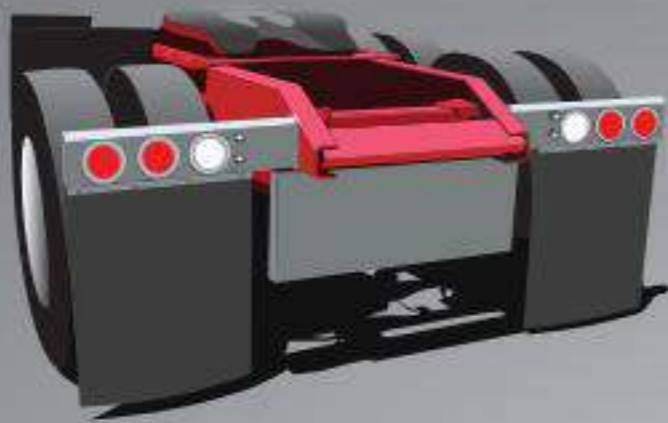

Built with TRUX's Innovative Dual Revolution technology, the industry's first D.O.T Compliant light with a double function of Red Stop, Turn & Tail AND White Back-up, is here!

Dual Revolution improves back-up safety in limited visibility and delivers double the brightness compared to any standard LED light. It works by all of the lights' diodes simultaneously changing from striking red to brilliant white.

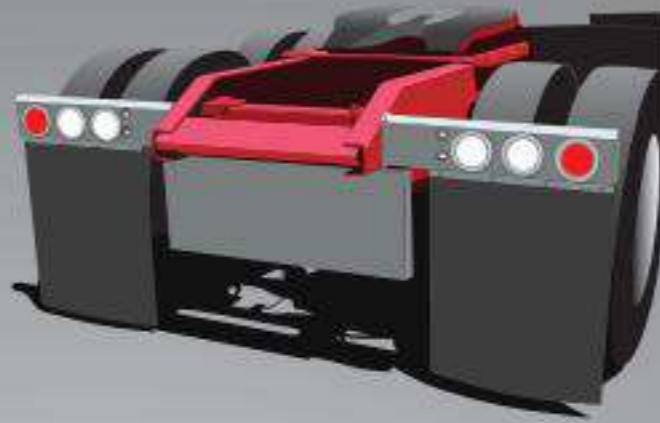

This is all available without sacrificing the look on your truck by adding unnecessary accessories. Keep the back of your truck uniformed in style while enhancing functionality, with Trux's Dual Revolution LEDs. Giving you the confidence to back-up in any light condition.

RED STOP TURN & TAIL TO WHITE BACK UP EVERY DIODE! EVERY TIME!

STANDARD CONFIGURATION
2 x BACK UP LEDs

TRUX CONFIGURATION
4 x DUAL REVOLUTION LEDs

**2X
MORE
BRIGHTNESS**

Standard rear light configurations only allow for 2 working back up lights; whereas, TRUX's 4x40 offers twice as much white light with 4 back up LEDs.

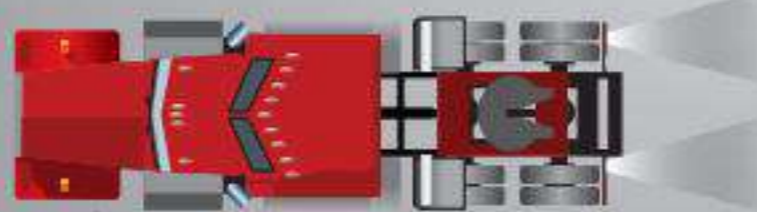

Giving YOU twice as much visibility!

INSTALLATION

To plug the primary stop, turn and tail function, use a standard 3 prong pigtail, 2 prong pigtail or female wire harness (depending on LED model). An extra male bullet plug is provided for the back up function.

Some models have 3 wires (Red, White & Black) for the Stop, Turn & Tail Function. An extra yellow wire is provided for the back up function.

TRUX POLY FENDERS

INDESTRUCTIBLE QUALITY THAT'S INEXPENSIVE

TRUX's indestructible Poly Fenders are made for extreme conditions. Tested and true to their durability, these Poly Fenders are chemical, rust and dent resistant. TRUX's rigid Poly Fenders endure intense weather without any strain or damage. Built to last and to diminish spray, keeping your truck in style while providing superior driving conditions.

Little Maintenance is required due to its durability to withstand salt and corrosion. Simply wash with mild soap and water

TRUX's Poly Fender robust design is made to **withstand the nastiest conditions**

TRUX Poly Fenders are considered the "**Bang for your buck**", initial low expense and is lighter than steel and aluminum, cutting fuel consumption tremendously

Rigid Polyethylene that will **not dent, nor rust** and is designed to **resist chemical spills and UV Rays**, in which quality has been tested and sustained in various climates (-57°F / 176°F)

45° ANGLED MUD FLAP HANGERS

TRUX's entire 'bang for your buck' Mud Flap Hanger line will shine impressively with a mirror finish across all the 430 stainless steel and chrome models. Plus, they have the added benefit of a spring-loaded system. This means that when facing the test of bumps, potholes and uneven roads, Trux's Mud Flap Hangers pass with flying colors, able to withstand whatever challenge the road can conjure up!

The vast line of spring-loaded Mud Flap Hangers were constructed with YOU in mind. All Mud Flap Hangers are sold with proper hardware and locking nuts to secure the Mud Flap Hangers to the rear of the truck. They're also designed to meet FMVSS108 standards so rest assured, you are buying top notch quality that can be counted on!

LED LIGHTING

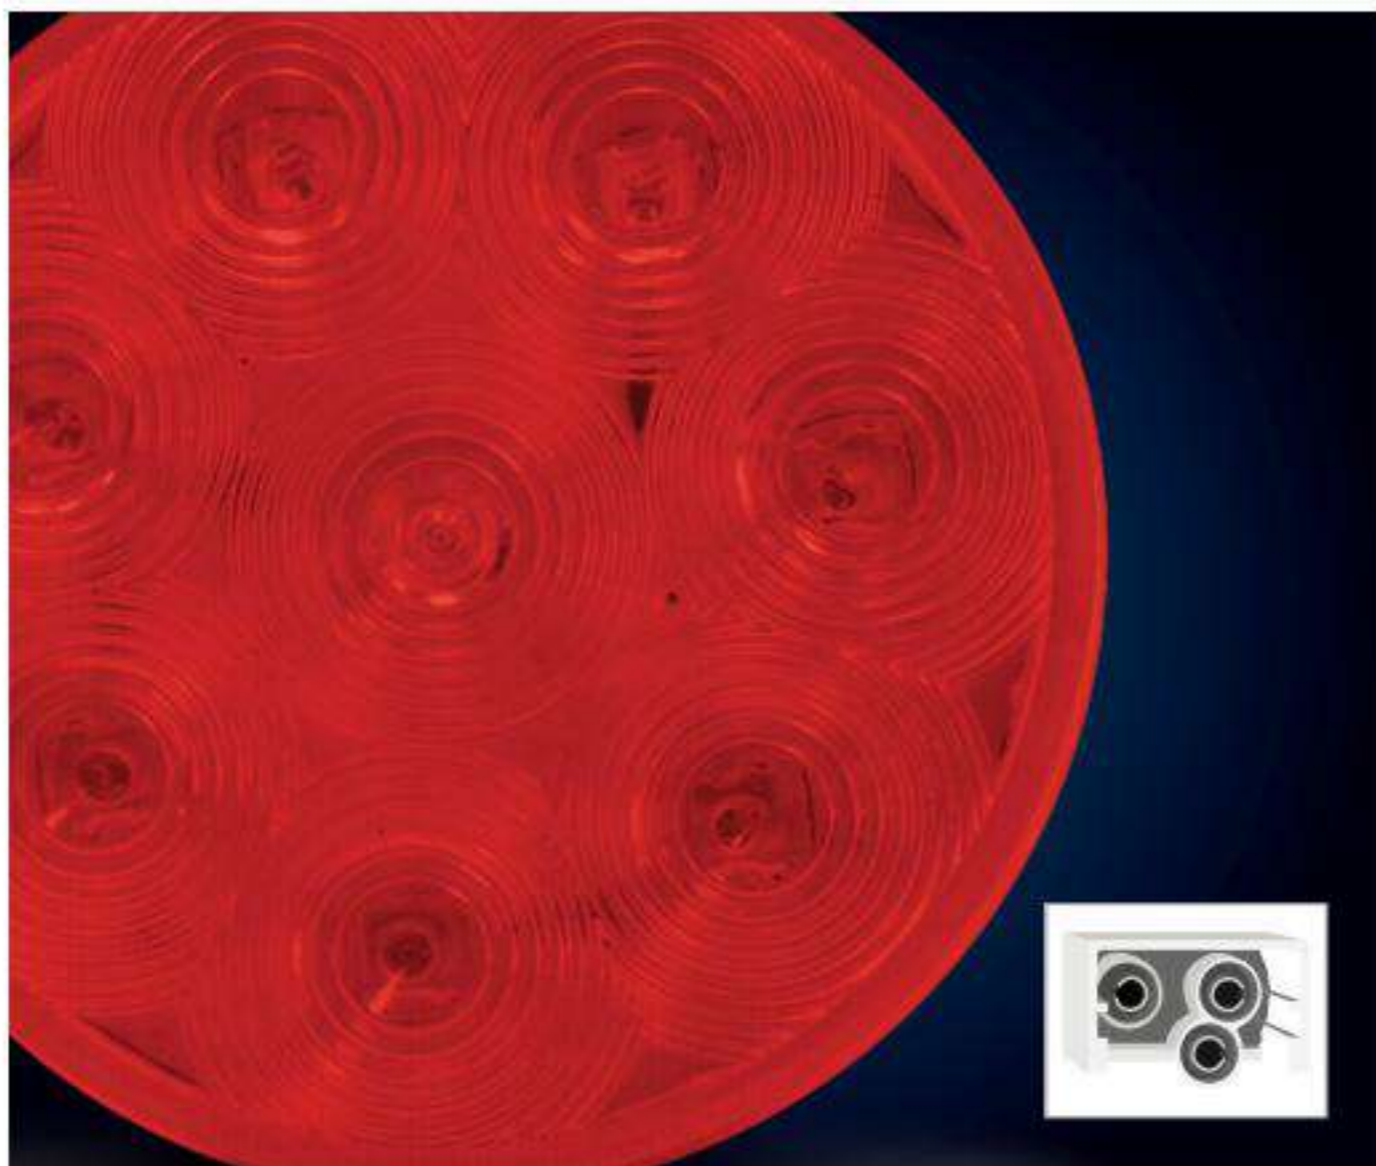

BEST PERFORMANCE, BEST QUALITY, BEST PRICE

Trux Accessories' vast selection of Standard LED lights are available in many different shapes and sizes, all of which are D.O.T. Compliant. Why buy from TRUX instead of your current supplier? The answer is our extremely low defect rate, best among ALL manufacturers and our competitive prices which puts money back in your pocket.

Designed for exterior use on any Class 8 truck, and accompanied by a wide range of accessories including grommets, bezels, strobes and wire harnesses, you can be sure that there's Trux LED lighting to suit any situation.

Trux Standard LEDs are known for their Polycarbonate lens durability that protects the light from any road debris. Plus, an IP67 waterproof rating ensures that the light will have no issue in rainy conditions - it has even been tested in every extreme weather conditions possible. The standard LEDs run on 12v systems, designed for North American trucks.

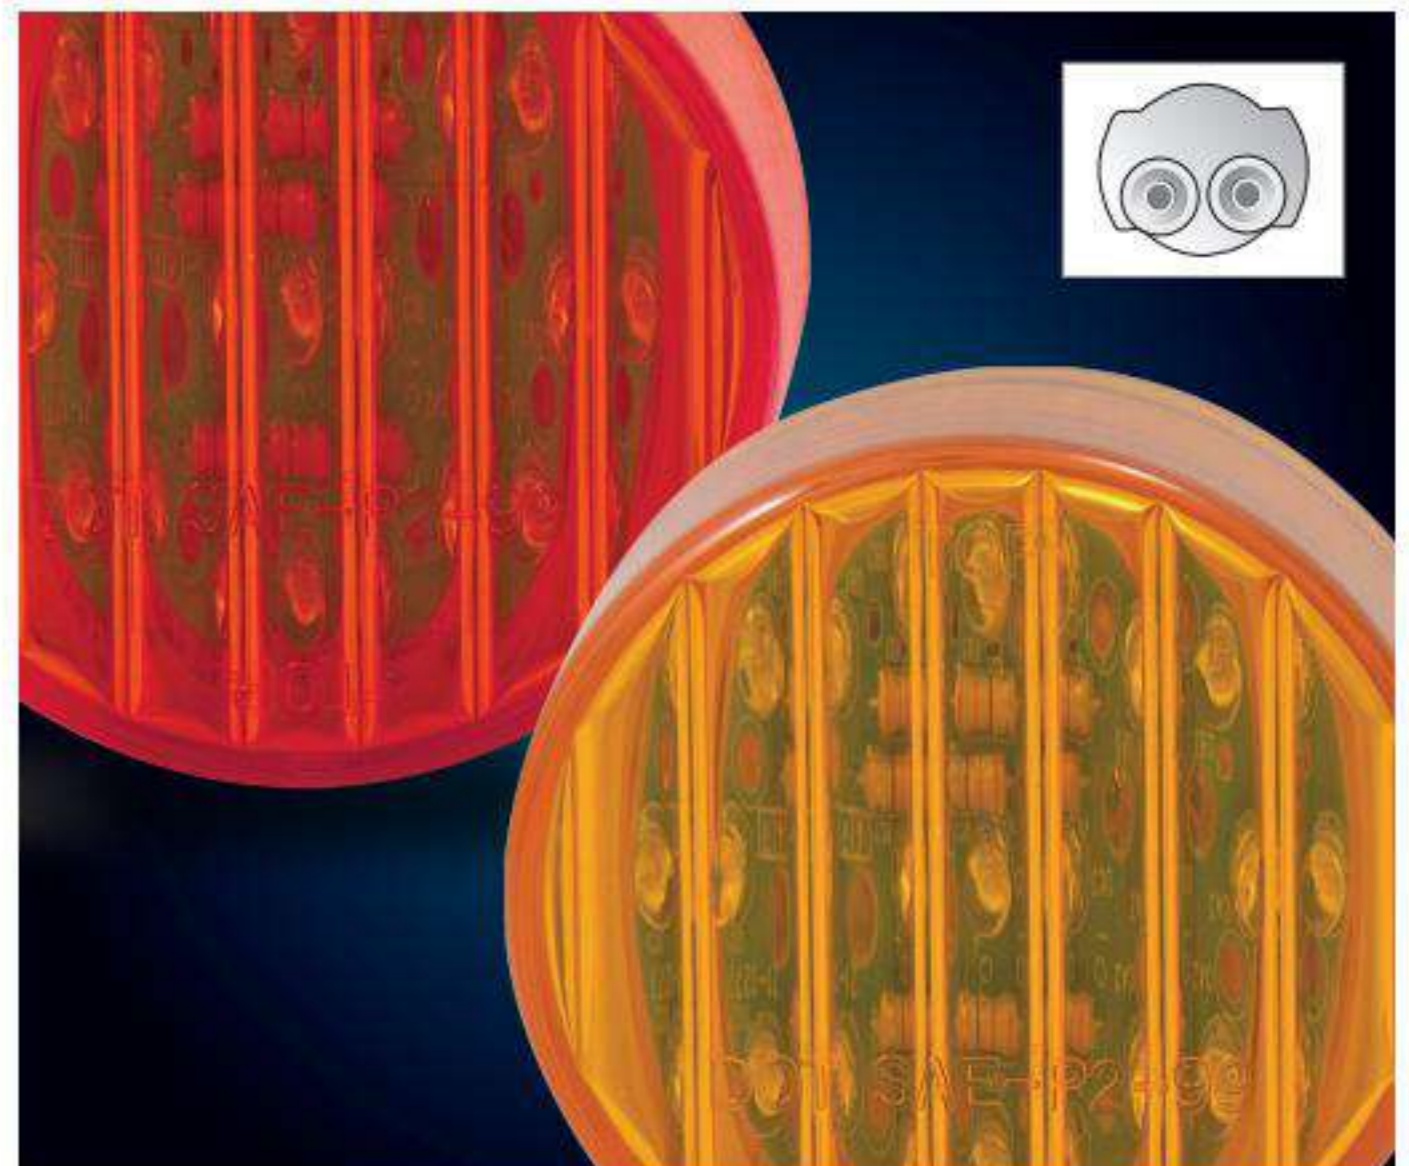

The primary benefit of these lights is the perfect combination of energy efficiency and longevity. They can outlast any incandescent light. This reduces cost, downtime due to maintenance and preserves the truck battery life. Trux Standard LEDs are a WINNER!
