

VCT Wheel®

In 2001, our design team set out to create a cutting-edge line of wheels that would include four major elements - Innovation, Style, Quality and Competitive pricing. The result was the provocative line of VCT wheels, which quickly gained popularity across the continent with distributors, retailers and end users. Within a short period of time VCT introduced the GITANO line with its modern styling and innovative designs, allowing VCT to reach a more diverse customer base. This resulted into one of the fastest growth phases of the company. VCT's next step in expanding our wheel lineup was designing and introducing the SCORPION line, which was specifically for the off-road market. The Scorpion line has become one of the most sought-after off-road wheels on the market due to its impressive styling and eye-catching looks. The response to this line was highly positive and has won various accolades from the industry.

VCT distributes out of its warehouse in Los Angeles where wheels can be shipped to all parts of the country and all parts of the globe in a timely manner. We also take pride in working hard to ensure that we distribute high quality products and competitive prices that reflect the reputation and the stature of the VCT group and its brand names VCT, GITANO and SCORPION. With rapid growth rates, VCT Groups brands have quickly gained the attention of both retailers and competitors across the globe.

Together the VCT family of brands appeal to a wide array of consumers at all price points. In order to ensure we maintain the best quality and offer our most competitive prices, we have strategically aligned ourselves alongside a leading China-based wheel manufacturer with more than 20 years of experience. With business growing at a record pace, we set up our office in Hong Kong, at the doorstep of China. VCT's products and brands can now be found in the UK, Sweden, South Africa, France, Germany, Russia, Mexico, Canada, Japan, Australia, Venezuela, UAE, Turkey, Malaysia, Philippines and the Caribbean.

VCT continues to strive to set the industry standard for excellence and it is this standard that has made us the envy of the wheel industry.
