

**Volant**

**Volant®**  
PERFORMANCE AIR INTAKES

### HIGH VELOCITY AIRDUCT

Delivers maximum air volume to your engine improving horsepower, torque, fuel economy and throttle response.

### PREMIUM MULTI-PLY SILICONE

Premium grade silicone hoses create air tight connections; provide excellent strength and flexibility while resisting drying and cracking.

### RUGGED CLOSED BOX CONSTRUCTION

Fully-enclosed filter box design blocks heat and allows for maximum filtration protection in harsh environments.

### CUSTOM FRIENDLY DESIGN

Customize the Volant logo to match your vehicle's overall color scheme. Red, White, and Blue color swatches are provided.

### TINTED ACRYLIC LID

Provides enhanced styling and functionality with generous filter inspection window.

### LEADING FILTER TECHNOLOGY

Volant has multiple filter options available allowing you to match a preferred filtration technology to your driving style; On-Road or Off.

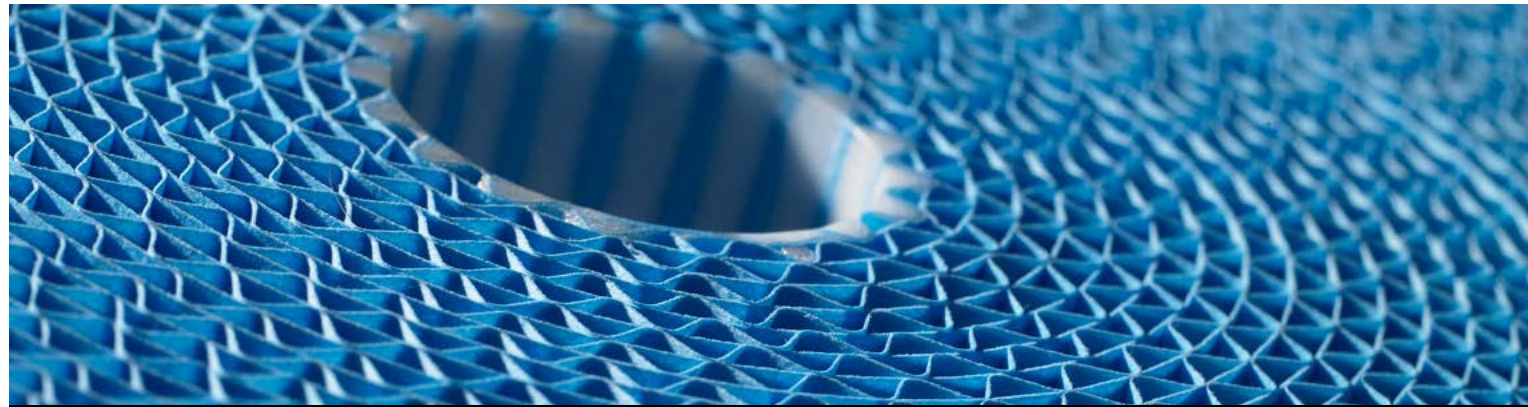

Options Include: Pro5 (Oiled), DryTech 3D (Synthetic), PowerCore® (No Maintenance), or Primo Diesel (Oiled). Learn More Page 3.

## DONALDSON POWERCORE® FILTER

PowerCore® Filtration Technology has been proven in the field with more than a decade of use and over 15 million filters sold – it's trusted by professionals to deliver in the harshest environments on the planet.

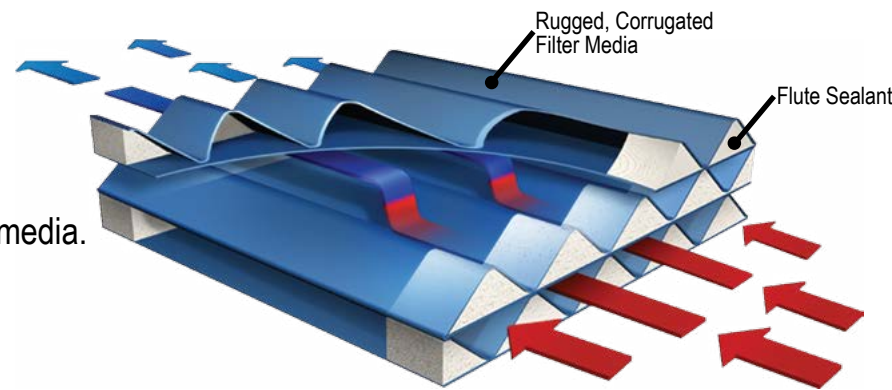

Conventional cellulose fibers are larger than PowerCore® Ultra-Web® nanofibers, and have larger spaces between the fibers, causing contaminant to load in the depth of the media plugging the airflow path; resulting in higher restriction and less capacity.

White circles represent the diameter of a 2µ and a 5µ particle.

PowerCore® Ultra-Web nanofibers have submicron diameters and small inter-fiber spaces, which result in more contaminant being captured on the surface of the media and less restriction.

### HOW DOES IT WORK?

1. Dirty air travels in and is filtered in through the media.
2. Air makes one pass through the media.
3. Clean air travels on to your engine.

**IDEALLY SUITED FOR DUSTY OFF-ROAD DRIVING CONDITIONS DUE TO THEIR UNMATCHED FILTRATION PROPERTIES.**

Donaldson®, PowerCore® and Ultra-Web® are registered trademarks of Donaldson Company, Inc.

## PRO-5 & PRIMO OILED FILTERS

### PRO-5 OILED FILTER (GAS ENGINE APPLICATIONS)

Improved driving performance requires engine efficiency and power creation. Maximizing airflow to your engine is the key to unlocking its performance. For the driver looking to maximize engine performance, Volant offers cutting-edge Pro-5 cotton gauze air filters.

Five Layers of cotton gauze filter media separate Volant's Pro-5 air filters from the competition. Pro-5 Filters are made from premium textiles, specifically chosen to produce an ideal blend of airflow and filtration properties that maximize power gains. Pro-5 filters maximize the performance of your engine while offering extended maintenance intervals. With numerous deep pleated segments, Pro-5 Filters offer increased filtration surface area and in-turn overall filter loading capacity. "What does that mean?" Reduced filter maintenance intervals, allowing you to drive further with less required maintenance.

### PRIMO OILED FILTER (DIESEL ENGINE APPLICATIONS)

Diesel engines operate differently from gas engines requiring greater air volume than gas engines. In order to achieve adequate airflow diesel engines create a tremendous amount of suction and under certain conditions are capable of collapsing poorly built filters. To meet the unique demands of diesel engines, Volant Primo filters are designed with 8 Layers of filtration and heavy duty filter mesh that adds structural integrity to prevent filters from collapsing.

With 8 rugged layers of interwoven media, designed to stop debris from entering the engine and enhance strength; Primo filters have been engineered to stand up to the unique demands of diesel engines

## DRYTECH 3D FILTER **MAX POWER & REDUCED MAINTENANCE**

Using specialized hydrophobic polysynthetic fibers, DryTech 3D Filters boost filtration capacity, lengthening the time between maintenance intervals up to **50K miles** depending on driving conditions. Vastly increased media depth through unique pleating geometry, enables each filter to trap more particulate than traditional cone style filters; allowing you to drive further before requiring service. DryTech 3D Filters reduce maintenance time by resisting saturation that occurs during washing, dropping drying time to as little as **2 hours**. For an even faster clean, vacuum off surface particulate to restore filter performance.

**RECOMMENDED FOR:** Consumers who prefer the ease of maintenance of a non oiled filter but the performance gains of a traditional cotton gauze media.

**WILL NOT VOID FACTORY WARRANTY**

# MAKE THE RIGHT CHOICE

## Volant Filtration Technology for Every Driving Style

### UNRIVALED OFF-ROAD FILTRATION

#### Donaldson PowerCore® [DRY]

Volant Performance is an exclusive distributor of no maintenance (up to 150K miles) Donaldson PowerCore Ultra-Web® Dry Filters. These filters are designed for maximum filtration in harsh, dry arid environments and have been proven to perform world-wide with over 15 million filters sold.

PowerCore® is a registered trademark of Donaldson Company Inc.

### PEAK HIGHWAY PERFORMANCE

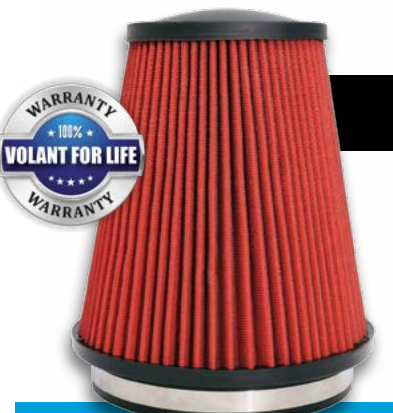

#### Pro-5(Gas) / Primo(Diesel) Cotton Gauze [OILED]

Volant Pro-5 & Primo Diesel Filters offer an ideal blend of performance and filtration for on-road driving conditions. Each filter is designed to maximize air flow boosting horse power and torque, while multiple layers of filtration media to work together to provide filtration protection. Pro-5 and Primo Diesel filters require semi-regular cleaning and re-oiling to maintain peak performance.

### MAXIMUM VERSATILITY

#### DryTech 3D Synthetic [DRY]

DryTech 3D Filters offer a high flow, no oil, low maintenance (up to 50K) solution to your filtration needs. DryTech filters have high filtration efficiency values while maximizing airflow increasing vehicle performance. Simply vacuum the surface of each filter for a quick clean or rinse with soap and water to maintain performance.

## THROTTLE BODY SPACER

In the quest for more air, the throttle body is the last assembly that can be modified before air enters the engine. Volant throttle body spacers employ a unique set of fins finely tuned to accelerate airflow and increase turbulence, producing higher air pressure. Increased air pressure enhances cylinder combustion, which increases throttle response and power.

Volant throttle body spacers offer an affordable and efficient way to boost performance of your Truck, Jeep or SUV.

[SEARCH VEHICLE FOR FITMENT](#)

## PROTECTIVE PRE-FILTER

Extreme driving conditions require specialty equipment. If you are the type of driver that enjoys conditions other drivers avoid, the Volant pre-filter is a vital accessory.

The Volant pre-filter extends maintenance intervals and is your filter's first line of defense against a battery of elements. Made with specialty synthetic material, every pre-filter shields, mud, dust and water from entering your air path yet allows air to pass freely. Gain confidence while driving your vehicle off-road by using a Volant pre-filter.

## RECHARGE CLEANING KIT

Your cotton gauze air filter needs to be cleaned when necessary to maintain peak performance and the health of your engine. Using Volant's 2 Step re-charge kit you can return your air filter to peak operating efficiency by simply cleaning and oiling.

We recommend checking your filter every 10-15K miles and cleaning and oiling at least once every 25K miles.

**APEX METAL INTAKES**

**HIGH DENSITY FOAM ENGINE SEAL**  
Seals to hood of engine reducing air temperatures to enhance power gains.

**METAL AIR DUCT**  
Designed with mandrel bends and precise cross sections to streamline airflow and reduce restrictions unlocking power from your engine

**SILICONE CONNECTIONS**  
Premium grade silicone connections offer air-tight connections that won't dry out over time.

**DURABLE BLACK WRINKLE COAT**  
Enhances the overall look of your engine bay while offering lasting protection from the elements.

**CUSTOM DESIGNED / PRECISION FIT HEAT SHIELD**  
Uniquely shaped to seal to vehicle body panels aiding air intake temperatures.

**OVERSIZED HIGH PERFORMANCE FILTER**  
Improves airflow, volume and velocity to enhance performance. Available in no oil DryTech 3D and MaxFlow 5 filters.

**POWER GUARANTEED**

DryTech 3D      MaxFlow 5
