

INSTALLATION INSTRUCTIONS

Van Window Screens

IMPORTANT BEFORE YOU BEGIN

Read these instructions and warnings completely before installation.

⚠ WARNING

This product can reduce the driver's ability to clearly see roadways, vehicular or pedestrian traffic and other objects through the rear and side windows of the vehicle, which can cause an accident. Extra precautions should be taken when driving a vehicle with this product. Make all adjustments necessary to ensure maximum visibility, including but not limited to, changing mirror and seating positions. State and local laws may prohibit obstruction of windows in a moving vehicle.

Qty.	1			2		Screens	

TOOLS REQUIRED

- Drill with 5/16" Hex Driver Bit or 5/16" Nut Driver
- Hacksaw or Wire Cutters
- File
- Pliers

NOTE

These Wire Window Screens are designed to fit in cargo areas of cargo vans. If your vehicle has interior window trim, it may require removal.

INSTALLATION INSTRUCTIONS

1. Align the Screen over the window frame and note areas where the screen may need trimming. Areas that may need trimming or bending are the Tabs and Latch. If you have window latches, open the latch to it's highest point and replace the screen to determine removal points. If trimming is required, be sure to file down any sharp edges after cutting.

CAUTION

To keep debris out of your eyes when trimming screen tabs or using self-drilling Tek screws, always wear protective eyewear.

2. Install the screen after proper alignment.

Figure 1.

NOTE - If tab removal was necessary, the screen can still be fastened by placing the screws to the inside of the outer framing as shown in Figure 2.

Figure 2.

- NOTICE -

Any modification or unintended use of this product shall immediately void all manufacturers warranties. Manufacturer disclaims all liability for injuries to persons or property resulting from any modification to, or unintended use of this product.
